Education

2017 – 2023	Bachelor's <i>Istanbul Technical University</i> Mechanical Engineering
2013 – 2017	High School <i>Afyonkarahisar Süleyman Demirel Fen Lisesi</i> Science High School

Languages

English	● ● ● ● ●	German	● ● ● ● ●

Professional Experience

10/2023 – 07/2026	Production Engineer <i>Mechanical Production and Maintenance Department, Eskişehir Compressor Plant, Beko</i> Compressor manufacturing processes. Establishment of rotor/stator mass production lines and cycle time improvement projects. Creation of solid models/technical drawings for machine spare parts and procurement processes. Development of interfaces and infrastructure using VBA for monitoring and planning production processes. Developing Python and SQL-based applications. Data analysis and reporting for continuous improvement projects in production and scrap reduction. Creating production master plans based on domestic and international orders, ensuring uninterrupted production flow through SAP-based material tracking processes.
07/2023 – 08/2023	Intern <i>Welding and Additive Manufacturing Technologies Department, TÜBİTAK SAGE</i> Laser welding machine, hydrostatic and pneumatic pressure tests, composite materials training, geometric dimensioning and tolerancing (GD&T) training, three-dimensional aluminum and titanium printing.
01/2021 – 11/2021	Deneyap Technology Teams Coordinator <i>Turkey Technology Team Foundation (T3 Foundation)</i> Organizing competition processes for 582 Deneyap technology teams. Organizing robotic competitions in the “Line Follower” and “Mini Sumo” categories at Teknofest.
07/2021 – 08/2021	Intern <i>Propulsion Aerodynamics Department, TUSAŞ</i> HAD analysis, engine air intake parameters and design, convergent-divergent nozzle analysis, boundary layer calculations, external drag calculation for inlets, nozzle parameter calculations, aerodynamic interface plane property calculations. Development of GUI and applets using Excel VBA and Python.
02/2020 – 01/2021	Instructor-Mentor Scholar <i>Turkey Technology Team Foundation (T3 Foundation)</i> Mentorship for rocket and unmanned underwater vehicle teams. Training in Aerospace and Artificial Intelligence.
2020 – 2021	Recovery Team Leader <i>Lagari Thrust Rocket Team</i> Hybrid rocket engines and rocket recovery systems.
2019 – 2020	Mechanical Team Member <i>Feza Rocket Team</i> 2019 Teknofest Rocket Competition. Mechanical design, structural analysis, and recovery systems. Composite body manufacturing, laser cutting, welding, 2-axis CNC, lathe and milling operations for part production and assembly.

Skills

Solidworks - Autocad Mechanical	● ● ● ● ●	Python - Excel VBA - Matlab	● ● ● ● ●
